

PRESSKIT

Radioactive.Cake, Zeitgeist, Munstrous, Dark Passenger...that's all Robert H. from Berlin Germany. Not only producer and performer for many years, he also established the music label Glitchy.Tonic.Records in 2009, which is now one of the leading forces in the subgenre "Psygressive Trance".

Taking the first musical steps around the time of the millennium, his skills and technique and productions were constantly evolving and advancing over the years. In late 2008 he felt he finally reached the quality to go way more professional. He brought Radioactive.Cake and Zeitgeist to life, aiming for releases and gigs and of course for good feedback. Getting all three, he soon wanted another challenge or rather more ways of expressing his musical creativity and he started Munstrous and Dark Passenger.

The total music range of all four projects put together goes from night time 'Psygressive' or 'Dark Progressive' to a bit more funky and jazzy and sometimes „swampy“ trance to some more techno stuff and downbeat.

Today, Robert can look back to a long list of releases and has quite some experience performing his stuff live. He played his projects at Festivals like Freqs Of Nature, Boom Festival, Solaris Festival, Cosmo Festival, Transylvania Calling, Pandemonium Festival, SpaceCamp Psyfari Festival and others.
